EDUCATION

- **Shree Guru Gobind Singh Tricentenary University** Haryana, India
Bachelor of Technology - Computer science; GPA: 9.33 July 2022 - June 2026

SKILLS SUMMARY

- **Languages:** Python, SQL, Bootstrap, JavaScript, HTML, CSS, ML
- **AI/ML Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib, TensorFlow, OpenCV
- **Frameworks:** React, Next, Tailwind CSS
- **Tools:** Git, GitHub, MySQL, Excel, IBM Cloud, Jupyter Notebook
- **Platforms:** Linux, Web, Windows, IBM Cloud
- **Soft Skills:** Leadership, Event Management, Public Speaking, Time Management

EXPERIENCE

- **IREED India** Gurugram
Web Developer(Intern) Present
 - **Frontend Development:** Developed and optimized responsive frontend interfaces for the company's web platform using modern full-stack technologies, improving user experience and performance.
 - **Product Development:** Collaborated in building "Top Trainer" from scratch, implementing reusable UI components, authentication flows, and dynamic dashboard features.
 - **Backend Development:** Currently working on backend development, including API integration, database management, and scalable server-side architecture for platform functionalities.
- **CyberCoders** Remote
Software Developer (Intern) May 2024 - July 2024
 - **Web Application Development:** Developed and Optimized robust web application using Reactjs , enhancing performance and user experience.
 - **Database Managment:** Managed database with Microsoft Sql Server to ensure efficient data handling and integrity
 - **Designed and implemented custom UI/UX elements with Bootstrap and Tailwind CSS to create visually appealing and responsive layouts.:**
- **Codsoft** Remote
Web Developer(Part-time) July 2023
 - **Developed a professional portfolio website to showcase internship projects and skills effectively.:** Designed and implemented a responsive landing page using modern front-end technologies.
 - **Created a calculator application with a user-friendly interface and responsive design.:**

PROJECTS

- **Task Flow** Live Link
Developed a modern task management web application that helps users efficiently organize, manage, and track daily tasks and productivity goals. Implemented authentication, task tracking, real-time updates, and responsive UI components for seamless user experience.
- **AI based PCOS/PCOD Detection** Live Link
Developed an AI-based system for detecting Polycystic Ovary Syndrome using patient symptoms and ultrasound image data, applying machine learning techniques for early diagnosis. Performed data preprocessing, feature engineering, and model optimization to achieve high prediction accuracy.
- **Real-Time Phishing URL Detection Using Machine Learning**
Developed a machine learning-based real-time Chrome browser extension to detect and track phishing URLs by analyzing URL features and classifying them using trained ML models. Performed feature analysis and classification validation to improve model accuracy.
- **Healers |** HTML, CSS, Javascript, REACT JS
Designed and developed a hospital management website for a blockchain-powered healthcare startup. Showcased doctor profiles, managed patient records, and implemented a user-friendly interface with secure and scalable features.

CERTIFICATIONS

- Hackathon Participation– E-SURAKSHA (Chandigarh) MUJHACKX (Jaipur)
- Data Analyst Bootcamp From Basics To Advanced-Udemy
- Django Using Python Workshop– Shape My Skills

VOLUNTEER EXPERIENCE

- **Event Organizer at TUSKER Society SGT:** Assisted in organizing college events and activities, coordinated with team members for smooth execution, and contributed to increasing student participation and engagement.
- **Team Lead at Code Club:** Supported technical events such as coding competitions and workshops, helped peers with programming concepts, and contributed to fostering a collaborative coding environment.
